

Know-how in Coupling Production for the Heavy-load Industry

HENFEL was founded in 1981 and is a Brazilian company located in Jaboticabal, federal state Sao Paulo, Brazil.

The company was originally established as small foundry which initially produced cast parts for the local agricultural industry. In the course of time the company's product portfolio was constantly expanded. Today mainly the following components are produced:

- **Bearing Housings**
- **Hydrodynamic Couplings with constant speed**
- **Hydrodynamic Couplings with variable speed**
- **Flexible Couplings**

HENFEL nowadays produces and supplies commercially successful and customer optimized coupling technology and hence ranks

among the leading providers in the field of hydrodynamic couplings. Apart from standard applications the company furthermore offers specific solutions for individual requirements. HENFEL maintains its own development department with qualified engineering, a certified quality management and is regarded as company with a high social and sustainable responsibility.

Facts & figures

Headquarters	Jaboticabal, federal state Sao Paulo, Brazil
Employees	129
Certified to	ISA 9001:2008
Overall area	appr. 25.000 m ²
Built-over area	appr. 9.220 m ²

- High production intensity with own foundry
- Successfully established at international companies
- Fast delivery performance especially for the after sales market
- High availability of standard products and its spare parts

Flexible Couplings
Henflex HXP

Hydrodynamic Couplings
Henfluid

Hydrodynamic Couplings
HFPM with variable speed

Bearing Housings

Henfel Indústria Metalúrgica Ltda.
